LiifeID Medicaid 2027

Help patients keep coverage and protect reimbursement

LiifeID helps your team identify patients who may qualify for Medicaid and streamline eligibility, enrollment and redetermination, with less administrative burden.

Prepare for more frequent Medicaid renewals

Beginning with renewals scheduled on or after Jan 1, 2027, most adults in the Medicaid expansion population will move to six-month eligibility renewals.[1]

Identify and enroll eligible patients

Help identify patients who may qualify for Medicaid and streamline eligibility and enrollment.

Protect coverage and reimbursement

Identify patients at risk of losing coverage and help maintain continuity of coverage and reimbursement.

Help prevent eligibility-related claim denials and lost reimbursement by supporting timely eligibility and renewal workflows.

Supports Your Workflow

LiifeID is designed to support the eligibility, enrollment and redetermination workflows your team already uses.
