# Transforming Health System & FQHC Operations

Revenue Integrity, Eligibility & Operational Efficiency
for Health Systems and Community Health Centers

## THE CHALLENGE

Health systems and Federally Qualified Health Centers face compounding financial and operational pressure. Eligibility errors at the point of service are the leading cause of claim denials and delayed reimbursement. Administrative overhead consumes resources that belong in patient care. FQHCs, serving the most vulnerable populations on the thinnest margins, bear the greatest burden. And across both settings, outdated intake workflows are costing organizations revenue they have already earned. The fix is consolidation, not replacement.

| Up to 50%* | SAME-DAY | 30-DAY |
|---|---|---|
| Reduction in Operating Costs | Eligibility Determination | Platform Deployment |

## THE LIIFE PLATFORM

A modular suite that unifies your EHR, billing, and eligibility systems into one intelligent workflow — no replacement required.

**LiifeID™**
Biometric identification & passwordless access

**LiifeIntake™**
Eligibility, enrollment & case management

## REVENUE INTEGRITY THAT PAYS FOR ITSELF

- Eligibility errors are the single largest preventable source of claim denials. Denial rates drop as eligibility is confirmed before the patient leaves registration
- Revenue cycles accelerate — clean claims go out faster and pay faster
- Staff hours reclaimed from rework are redirected to patient-facing care

## CUTTING OPERATING COSTS BY UP TO 50%*

- Fragmented eligibility verification, paper-based intake, and disconnected administrative processes are where margin quietly disappears.
- Staff are freed from repetitive verification tasks to focus on complex cases
- For FQHCs on thin margins, this cost reduction is operationally transformational

## FQHC-SPECIFIC ADVANTAGES

- Every verified encounter is a properly reimbursed encounter
- Presumptive approval gets care started while verification completes in the background

## INTELLIGENCE THAT DRIVES GROWTH

- Anticipate payer mix shifts, identify care gaps before they become costly readmissions.
- Model the impact of federal Medicaid policy changes before they hit the bottom line
- Optimize staffing, capacity, and resource allocation with real-time demand forecasting
- Turn program data into grant-ready population health evidence for FQHCs

## A RESPONSIBLE PATH TO GROWTH

Liife preserves your existing EHR, billing, and eligibility systems — and finally makes them work together. One intelligent workflow. Deployed in 30 days. Measurable financial impact within months. The result is not just a modernized operation — it is a more resilient one.

* Liife reports up to 50% lower operating costs. Savings are not guaranteed and may depend on the configuration, including use of other Liife products.
